

Leadership Bios

Glen Black, President

Glen Black, developer of the Air2G2 machine, is owner and president of GT AirInject. For twenty years, Glen has devoted his time and talent to developing, researching and testing the Air2G2 process. The process and the machines that utilize it do so by injecting air to aerify soil to release and relieve compaction, enhance beneficial microbial activity and force gas exchange in the soil, making "Air is everything to anything that lives" Air2G2's trademark tagline.

Together with his wife of 22 years, Glen and Sharon Black have two sons, Eric and Jason, and twin daughters, Sara and Stacie. Glen has a degree in Business Administration, with a minor in Soil Science. As a lifelong sports fan, Glen enjoys watching college football, baseball and, with his wife, College Softball.

The thrill of travel and adventure have taken Glen and Sharon across the globe, pursuing their "vision quest" to discover what's around the next corner or over the next hill. Their curiosity has allowed them to meet incredible people and see unbelievable sights. Glen enjoys golf, a little baseball, and bike riding both on and off road. To this day Glen loves seeing the Air2G2 machine at work in places like the United Kingdom, China, Russia, Utah, Texas, New York, Michigan, Florida and many other states and countries throughout the world.

Every day Glen gives thanks to God above for everything that he and his family have, and that includes all of the people who work for GT AirInject making it into the company that it is today. Integrity, forthrightness, and quality.

Leadership Bios

Todd Jones, General Manager

Todd Jones is the General Manager at GT AirInject, where he leads a talented workforce dedicated to developing and building quality turf care equipment. Todd was instrumental in GT AirInject's development of Air2G2 324, Air2HP, and the Air2GO Shuttle Trailer. He also led the implementation of a distributor and dealer network that covers more than 65 countries worldwide.

Todd grew up on a large hay farm in northeast Florida. He managed the family hay farm upon graduation from the University of Florida, where he studied Agricultural Engineering. Todd's love for growing hay grass and modifying/creating farm equipment translates well in his roles at GT AirInject.

Todd's personal interests lie in American football. He has coached football teams for most of the past 3 decades on several levels. Todd currently serves as Assistant Head Coach of the North Florida Pumas, a women's professional tackle football team, headquartered in the Jacksonville, Florida area. Todd helped the Pumas have a very successful second season, as they played for a national championship in 2018 in Bristol Tennessee.

Todd is married to Paige, and has six children: Silas, Bryce, Erica, Emma, Kaden, and Kash.

Todd has an identical twin brother named Scott. They work together at GT AirInject.

Leadership Bios

Scott Jones, Operations Manager

Scott Jones is the Operations, Inventory, and Research & Development Manager at GT AirInject. He oversees production of the AIR2G2 324, AIR2HP, and the AIR2GO Shuttle Trailer. Scott has also had a key role in the development of these projects and helped to establish the manufacturing flow from the ground up while implementing an inventory tracking and control system that helps the talented and dedicated production crew maintain efficiency, consistency, and quality of workmanship.

Scott grew up on a large hay farm in northeast Florida and studied Agricultural Engineering at the University of Florida. His love for farming and building or modifying farm equipment were the impetus for his joining GT Airinject. The process of air injection into the soil for compaction relief made perfect sense to him and he was eager to help develop a viable machine that could be used all over the world. Scott has worked with Glen Black since the beginning of GT Airinject on the AIR2 project.

Scott is married to Kristy and has five children: Joanna, Lindsey, Dylon, Liam, and Elleigh Mae and one grandson, Tripp.

Scott has an identical twin brother (Todd), who works with him at GT Airinject, and one sister (Jennifer).

Leadership Bios

Jarren Stevens, Production Manager

Jarren Stevens serves as Production Manager for GT AirInject, Inc. After serving four years in the United States Marine Corps as a Combat Engineer, Jarren was honorably discharged in early 2012. He spent the summer of 2012 taking college classes to prepare for a Dental Program in the fall. After realizing college wasn't his calling, he stumbled upon an opportunity he knew he couldn't pass up.

In late 2012, Jarren started at GT AirInject when the company was just getting off the ground where he started on the bottom rung, eager to learn the ropes. With the help of fellow colleagues within GT AirInject showing him the ins-and-outs of how to run a manufacturing facility, Jarren became the Production Manager in mid-2014. Jarren met his wife, Rebekah, in the midst of his college days. They later married and welcomed their daughter Kohen in October 2016. Jarren loves to stay active. He plays flag football and is known to indulge in a round or two of golf. He mostly enjoys spending as much time as possible with his loving family.

Brendan Hoban, Director of Sales

Brendan Hoban serves as Director of Sales for GT AirInject. An Atlanta native, he grew up the son of golf course superintendent, Mark Hoban, which is where his love for the turf industry first began. He started working on a golf course at the age of 15 and has held internships at several top-100 clubs, including Peachtree Golf Club, Atlanta Athletic Club, and East Lake Golf Club.

Brendan graduated from the University of Georgia's Turfgrass Management program in addition to competing as a D1 Track and Cross Country scholarship athlete. Growing up on a golf course he enjoys getting to visit other clubs around the country as he shares GT AirInject's innovative technology. In his spare time, he loves being active outside including playing golf, skiing, hiking, and surfing.
